

## ÖRNEK SORULAR

(Örnek Sorular Test Sistemi Hakkında Genel Bilgi Amaçlıdır. Yapılacak Olan Sınavlar İçin Herhangi Bir Taahhüt İçermez.)

**A) Part I: Grammar.** There are 10 Grammar Questions in this part. Read the questions and circle the correct one. (Each question is 1.25 pts.)

1. The aircraft \_\_\_\_\_ at 09.45 tomorrow.

- a) has taken off      b) took off      **c) will take off**      d) will be take off

**B) Part II: Vocabulary.** In this part there are 15 vocabulary questions. Read them carefully and circle the best answer. (Each question is 1.25 pts.)

2. Bird strikes can be \_\_\_\_\_.

- a) hazardous**      b) poisonous      c) injured      d) exciting

**C) PART III: Fill in the Gaps.** There are 15 'Gap Filling' questions. Choose the best answer to fill the gap. (Each question is 1.25 pts.)

3. The oxygen masks drop \_\_\_\_\_ an increase in the cabin altitude.

- a) because      **b) because of**      c) therefore      d) as a result

**D) PART IV: COMPLETION.** Complete the sentences with the appropriate choice given below. There are 10 Completion Questions. (Each question is 1.25 pts.)

4. The rockets must \_\_\_\_\_.

- a) deactivated      b) deactivate      **c) be deactivated**      d) deactivating

## E) PART V: READING COMPREHENSION.

There are 15 reading comprehension questions below. Read the context carefully and answer the questions carefully. (Each question is 1.25 pts.)

*The following questions 51, 52, 53, 54, will be about the context below.*

### Lightning Strike

Sometimes lightning strike can cause serious damage. Although you are quite safe inside the aircraft when lightning strikes as the electricity is conducted away by the aircraft skin (Faraday Cage Effect), it is necessary to check the compasses and radios immediately and then have the aircraft checked on the ground by an engineer.

Lightning is always located in the vicinity of CBs but is particularly likely when St. Elmo's fire is observed which is defined as "Visible evidence of electrical discharge at a tolerably slow rate, this is not a problem, does not cause any form of damage, and in fact serves in a positive sense as a warning that the environment is electrified, and lightning may possibly occur.

If you see St. Elmo's fire then you should take the usual precautions for both lightning and turbulence, i.e. Cockpit lightning up, Start switches to FLT and fly at Turbulence speed.

5. If you see St. Elmo's fire then.....

- a) you don't need to do anything
- b) you must follow the emergency procedures
- c) you should take precautions for fire and engine lost
- d) you should take precautions for both lightning and turbulence

## F) PART VI: TRANSLATION

Read the sentences and choose the most suitable translation below.

(Each question is 1.25 pts.)

6. The new aircraft equipments are more reliable than the previous ones.

- a) Yeni uçak donanımları eskilerinden daha kullanışlı.
- b) Yeni uçak donanımları eskilerinden daha güvenli.
- c) Yeni uçak malzemeleri eskilerinden kötü.
- d) En iyi malzeme ve donanım yeni uçaklarda var.
